One Day Eyelash Extensions Course With Kit £200

Eyelash extensions give definition to the eyes using mink eyelash extensions. The client's natural individual lash is isolated and the extension is applied. Eyelash extensions give emphasis to the eyes making them appear larger and the lashes longer and lifted. Semi-permanent eyelashes last as long as the life cycle of the natural lash. In other words the lash extension will fall off when the natural lash sheds should the application be done correctly.

Why choose to do the eyelash extensions course?

Eyelash extensions are one of the fastest growing treatments in the beauty industry. Clients are choosing eyelash extensions over strip lashes as they are more natural looking and weightless. Clients are opting for eyelash extensions for holidays as it saves time, reduces the spend on make-up and promotes a more natural and youthful look. In recent years even the celebrities are talking of their love for eyelash extensions. So why not join the celebs in the fast lane and book on to one of our eyelash extension courses.

1 Day Micro Ring Hair Extensions Course

Inc Tools - £200

Hair extensions are a form of lengthening the hair, giving finer hair a thicker, fuller more volumised look. Hair extensions are a semi-permanent method of lengthening hair and the results can last 4-6 months depending on which method is used and how well they're maintained. The results also depend on the type of hair used.

At Chic Beauty Academy we recommend using AAA+ indian remy hair. If low quality hair is used the results won't last as long and the hair will get damaged over time.

At Chic Beauty Academy we are offering a one day Micro Ring Hair Extensions Course. Micro Rings is the least damaging hair extensions method for the hair. You don't use glue, heat or any form of metal on the hair. We use silicone micro rings and clamp them to the hair.

What makes Chic Beauty Academy different to other companies is we don't have you working on a model head we have you working on each other on the course so you get the feel of working with real hair which makes all the difference.

On our course we provide all tools needed to carry out the procedure – which you then take away with you.
